Education

2021 - 2025

Bsc. (Hons) in Information Technology

University of Moratuwa

2020

Diploma in English

British way English academy

Expertise

- React.js
- Node.js & Express.js
- ASP.NET
- CSS
- MS SQL & Mongo DB
- C Language & Java
- Github
- Data structures
- Trello

Language

Sinhala

English

Tharindu Ruwanpathirana

IT Undergraduate

I am an IT Undergraduate student at university of Moratuwa. As a curious and creative individual, I am constantly seeking out new opportunities to learn, grow, and make an impact. With a passion for problem-solving and a love for technology, I am eager to explore the world of Software Engineering and put my skills to the test.

Projects

Mora UXplore1.0 Official Website

I had the opportunity to serve as the **Web Development Team Lead** for the IEEE Student Branch of the University of Moratuwa's Mora UXplore1.0 event. Our team utilized the **MERN Stack** to develop the official website for the event, which included features such as Team Registrations, a Team Dashboard, an Admin Dashboard, a Leaderboard, and a real-time updated Landing Page.

Configuration Console (2nd Year Software Project)

Our team has been developed a web-based console solution for software companies that sell products through partners. Partners may lack technical knowledge, so our solution provides appropriate access to servers and source files for Super Admin, Admin, and Partner users. By streamlining bug reporting and resolution, our console frees up developers to focus on their work. We are using **React.js**, **ASP .Net**, and **MSSQL** to build the frontend, backend, and database components of our solution.

Full Stack Blog Website (CR BLOG)

I developed my own full-stack article app using the MERN stack that allows users to register, login, create, delete, and update articles while allowing other users to view them. The app has a robust backend with **Node.js** and **Express**, a **JWT-based authentication** system, and a **MongoDB** database. The front-end is built with **React.js** and has a clean and intuitive user interface. This project gave me valuable experience in full-stack development and expertise in using the MERN stack for building responsive web applications.

Task Manager API

Icode Innovation official website (On Going)

Experiences

○ 2022 - 2023
IEEE Student Branch | Mora UXplore1.0
Web development team Leader

● 2022
IEEE IAS Society
Web development team Member

Achievements

Merit Winner of Hackmoral5.0 2022

Certifications (Included in my Linkedin Profile)
